# FLEX

## 10W-120W LED Floodlights

IP65 rated | high power | energy saving

# Why is FLEX better?

## Here are just a few good reasons...

### FLEX is a new type of LED floodlight.

With FLEX, you're investing in a new level of build quality, world class components and reliability. These products have been precision engineered to deliver the lowest cost and high efficiency solution you demand as a real professional.

#### EXCELLENT ILLUMINATION

State of the art LEDs combine with high quality polished reflector for maximum light output

#### QUALITY THROUGHOUT

Superb build quality and finish detailing right down to the grained anodised paint

#### RELIABILITY AT THE HEART

Powered by high lifetime driver from the renowned PowerLED brand. Dual Driver Technology on 100W & 120W Models

#### ROBUST SPRUNG STEEL CLIP

Quick access to lens to allow change of colour whilst still ensuring IP65 sealed connection - no matter how often you access

#### BUILT-IN HEAT CONTROL

Cast metal luminaire casing with integral heat dissipating fins for stylish design with real performance

#### BETTER DEGREE OF ACCURACY

Sturdy bracket allows adjustable multiple angle mounting settings using Allen key locking mechanism

10W, 30W, 50W, 80W  
100W & 120W  
models available
